Small Business · Olathe, Kansas · UEI PRPBEM9HEND3 · CAGE 15CS5

Company Overview

Blue Peak Data Consulting builds the dashboards, data pipelines, and reporting systems government agencies use to track spending, measure program performance, and make decisions. We run a senior-led model: the principal does the work directly, and contracted 1099 independent contractors under signed rate agreements cover specialist scopes when a project calls for them.

Core Competencies

- **Power BI dashboards and semantic models:** DAX, row-level security, scheduled refresh, executive- and program-level reporting
- **SQL and Python data pipelines:** ETL ingestion, transformation, and refresh against warehouse and cloud sources, including messy, delayed, or siloed systems
- **Power Platform and Microsoft 365 automation:** Power Automate approval routing, Power Apps, SharePoint workflow and form automation
- **Federal grant compliance reporting:** outcome, spend, and projection tracking on monthly and quarterly cycles
- **Specialist stacks:** GIS, design, and other specialist scopes through the same contracted-specialist model

Differentiators

- **A working demo before award.** Where the solicitation allows, we build it on synthetic data during the proposal window: evaluators score something they can click, not a promise.
- **Solo-delivery cost efficiency.** The person who wrote the proposal builds the product: no handoffs, no junior staff learning on your contract.
- **Microsoft-native depth.** We work inside the Microsoft 365, Power Platform, and Azure infrastructure agencies already own: no new licenses, no parallel stack.

Relevant Experience: Principal's Individual Record

The engagements below are the individual experience of Sergei Sukiasyan, Blue Peak's principal, from prior employment: principal experience, not Blue Peak company past performance.

- **NeighborWorks America** (congressionally chartered nonprofit), 2014 to 2022. As Lead Analyst, led reporting for a \$30M multi-jurisdictional federal initiative (2019 to 2022): Tableau on SQL Server, grantee data integration, and compliance reporting that passed federal funder review.
- **Lumen Technologies**, Lead Strategic Data Analyst: unified a sales pipeline spanning six source systems into one Power BI environment (Azure Data Factory, SQL Server), and built and ran an analytics product line serving 100+ users across VP, manager, and rep audiences.

Blue Peak Data Consulting LLC: single-member Kansas LLC, for-profit, founded July 23, 2025 · SAM.gov Active (through May 4, 2027) · DSBS profile complete · NAICS 541611 (primary), 518210, 541511, 541512, 541613, 541618, 541690, 541715, 541720; Small Business under each
